

Contact-Cooled Rotary Screw Air Compressors

R-Series 55-75 kW

A New Level of Reliability, Efficiency and Productivity

Ingersoll Rand R-Series rotary screw air compressors offer the very best of time-proven designs and technologies with new, advanced features to ensure the highest levels of reliability, efficiency and productivity available.

Xe-145M option shown

Progressive Adaptive Control™ (PAC™) Protection

Continuously monitors key operating parameters and adapts to prevent unexpected downtime.

- Increases uptime by scanning and adjusting operating parameters in response to changes in filter condition
- Ensures peak performance with real-time electronic maintenance indicators
- Optimises energy consumption and reduces noise by adjusting fan speed
- Improves productivity by proactively monitoring and conditioning incoming power

V-Shield™ Technology

Leak-free design with stainless steel pipes and long-life metal-flex hoses.

- Repeatable leak-free connections using superior elastomeric seals
- Reduces downstream contamination with stainless steel air piping
- Extends compressor life and reduces noise via vibration isolation system and metal-flex hoses

Xe-Series Controller

Features an intuitive high resolution colour display with web access.

- Remote access and control using web-enabled communications with a standard web browser
- Achieves system optimisation through built-in performance analysis and trending
- Clear and intuitive compressor controls with high intensity LED indicators and large navigation buttons
- Increases efficiency and stabilizes pressure by sequencing up to 4 Xe-controlled compressors without additional hardware

Sequential Cooling System

Significantly improves efficiency, serviceability and noise level.

- Reduces thermal stress and extends life using independently-mounted, free-floating heat exchangers
- Reduces the energy required to remove harmful condensate in downstream air by significantly lowering discharge temperatures
- Lowers energy consumption and noise with an energy-efficient centrifugal blower

Total Air System integrated dryer option shown

Total Air System (TAS)

Clean, dry air in a single package that minimises installation costs and space.

- Protects downstream equipment with:
 - Integrated refrigerated dryer that provides dew point suppression up to 46°C (115°F ambient temperature and 40% relative humidity)
 - Standard high efficiency coalescing filter that delivers ISO Class 1-4-2 quality air
- Increases reliability and efficiency with a lower pressure drop than typical dryers and patented 3-in-1 heat exchanger
- Reduces service time and cost with single-point maintenance and monitoring
- Prevents unplanned shutdowns with PAC™ Protection by adjusting operating parameters in response to changes in filter condition

The Decision is Yours

Our optimised, energy-efficient packages deliver the combination of performance and value that best fits your specific needs. At Ingersoll Rand, it's all about value...and choice!

Nirvana VSD EFFICIENCY

Variable speed with single-stage airend

Fixed speed with single-stage airend

Total Air System

Optimised dryer, filtration system and compressor in one convenient package.

Innovative Design, Flexible Choice

Time-Proven Reliable Airends

Robust Airends

Used in compressors worldwide, Ingersoll Rand single-stage airends are both reliable and efficient.

- Precision machined rotors
- Highest quality tapered roller bearings
- Integrated coolant flow to eliminate leak paths

Energy Recovery System (ERS)

The Ingersoll Rand Energy Recovery System (ERS) provides a cost-effective way to reduce your energy bills and benefit the environment by capturing compressor heat and putting it to work.

- Supplements current water heating system
- Ensures years of trouble-free operation with corrosion resistant material

n Efficiency for Variable Demand

Nirvana Variable Speed Drive (VSD) Compressors

Ingersoll Rand VSD compressors feature the highest efficiency Hybrid Permanent Magnet (HPM) motor.

- Unlimited start/stops and shut off to conserve energy
- Rated for continuous duty — 100% load, 24/7, 46°C (115°F)
- Stable, constant pressure control
- Virtually no degradation in specific power at partial load
- Stable power factor over control range

Maintenance-free, bearingless motor design

Fewer rotating parts — no pulleys, belts or couplings to wear out

i Efficiency for Constant Demand

Fixed Speed Compressors

Ingersoll Rand R-Series fixed speed compressors are the most reliable and energy-efficient solution for processes with constant demand.

- Class F insulation B temperature rise
- IE3 supreme efficiency class motors
- Compressors can be outfitted for continuous and reliable operation in harsh conditions, even outdoors in rain and dust, from -10°C (14°F) up to 55°C (131°F)
- IP65/NEMA 4 electric panels

Continuous duty high-performance TEFC induction motor

Standard Features		Fixed Speed	Nirvana VSD		
Category	Description	i	n		
Airend	Time-proven single-stage airend	●	●		
PAC™ Protection	Scans and adjusts operating parameters in response to filtration changes	●	●		
	Real-time electronic maintenance indicators and shutdown protection	●	●		
	Blower speed adaptable to ambient temperature		●		
	Automatic coolant temperature control to eliminate moisture build-up		●		
	Integrated line reactor in compliance with industrial EMC standards		●		
Cooling System	Air-cooled sequential cooling system optimised for efficiency & serviceability	●	●		
	Energy-efficient and low noise centrifugal blower	●	●		
	Generous package cooling system rated for 46°C (115°F) ambient	●	●		
	Moisture separator	●	●		
	Electronic no-loss condensate drains	○	●		
V-Shield™ Technology	Stainless steel air piping	●	●		
	Vibration isolation pads and premium metal-flex hoses	●	●		
	Repeatable leak-free connections with superior elastomeric seals	●	●		
Services	Ergonomic swing-out lid on the separator tank	●	●		
	Simple ducting (single air inlet and single air outlet)	●	●		
	12-month full package warranty	●	●		
Auxiliary Systems	Noise attenuation enclosure	●	●		
	Package pre-filtration	●	●		
	Long-life filtration and separation elements	●	●		
	Extended life Ingersoll Rand premium grade coolant	●	●		
	Flow control by variable speed technology		●		
Motors & Electrical Systems	Flow control by full load/no load regulation system	●			
	Control panel protection, IP65/NEMA 4 electrics	●			
	Star-delta reduced voltage starter	●			
	High-efficiency TEFC IP55 motors - Class F insulation with B rise	●			
	Hybrid Permanent Magnet (HPM) motor – EMC-compliant		●		
	Control panel protection, IP65/NEMA 12		●		
	Variable speed drive on main motor & centrifugal blower motor		●

*FAD (Free Air Delivery) is full package performance including all losses. Tested per ISO 1217:2009 Annex C and is measured at 0.5 bar g/10 psig lower than maximum pressure on non-TAS units and at maximum pressure on TAS-equipped units.

**FAD (Free Air Delivery) is full package performance including all losses. Tested per ISO 1217:2009 Annex C and capacity range is measured at 7 bar g/100 psig.

[†]TAS units deliver ISO Class 1-4-2 quality air measured at steady state conditions in accordance with ISO 8573-1:2001 that dictates inlet air to package of 25°C and relative humidity of 60%.

Ingersoll Rand...At Your Service

To keep your systems running at maximum efficiency 24 hours a day, 7 days a week, Ingersoll Rand designed UltraCare, a five-year all-in-one maintenance program for rotary compressors and air dryers.

- 5-year warranty
- One price covers all, there are no hidden extras
- Energy savings through efficient operation
- Minimised risk of breakdown
- Fixed costs over five years
- Extendable contract

Visit www.ingersollrandproducts.com/ultracare or contact your Ingersoll Rand distributor to learn more.

Count on Ingersoll Rand for All Your Air System Requirements

Ingersoll Rand Industrial Technologies provides products, services and solutions that enhance our customers' energy efficiency, productivity and operations. Our diverse and innovative products range from complete compressed air systems, tools and pumps to material and fluid handling systems. We also enhance productivity through solutions created by Club Car®, the global leader in golf and utility vehicles for businesses and individuals.
